

To whom it may concern,

Over the past year I have reduced oil consumption by over 1200 gallons, saving \$30,000 over the previous year using Maglube's LD-300L lubrication and lubricant system. As an engineer, I have worked with many vendors. I must say with a same day turn around for emergencies by the Maglube Distributor in my region, Reddsphere, Inc., has definitely provided service after the sale. Reddsphere walked me through the specifications on each system before we installed, to determine the correct system for our application. For instance, one of our miter cut saws was a difficult job but Reddsphere and Maglube were able to route the nozzles during installation in such a way that the blade was lubricated at all angles. The precision of the system is impeccable. It is much better than spraying as much oil as possible and hoping it hits the right area, which was done previously.

- SDS safety of the lubricant is great
- System is safe and easy to use
- Burr is down 1 to 2 thousandths
- Blade life is up several days to a couple weeks.

Sincerely,

*Andrew-J.L. Grieshop*
