PRODUCT DATA SHEET

MD-200

Liquid Lubricant

Description

MD-200 is a proprietary blend of organic fatty acid oils and synthetic esters that feature excellent lubricity and thermal stability. MD-200 is blended with a complete package of extreme pressure additives and stabilizers that provide excellent anti-wear characteristics. MD-200 is not water-soluble and is used at full strength.

Applications

MD-200 has excellent lubrication properties that make it useful in a wide variety of applications such as metal forming, wood and rubber processing as well as environmental sensitive applications such as forestry and mining. MD-200 is very cost effective in eliminating the use of flood coolants and the cost of disposal. Minute amounts are delivered directly to the cutting edge of a tool providing excellent heat transfer to the chips and eliminating degradation of the tool. Increased speeds and feeds are common with the proper use of all MagLube products.

Availability

MD-200 is sold in 1 gallon containers, 5 gallon pails, 55 gallon drums and 330 gallon totes.

Safety Compliance

A Material Safety Data Sheet is available for this product on MagLube's website at: www.maglube.com
